<b>Office Action Summary</b>	<b>Application No.</b> 10/531,901	<b>Applicant(s)</b> OUWERKERK ET AL.	
	<b>Examiner</b> Frank M. Lawrence	<b>Art Unit</b> 1724	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

## **DETAILED ACTION**

### ***Specification***

1. The disclosure is objected to because of the following informalities: The specification should be amended to include section headings such as "Background of the Invention" and "Summary". Also, a brief description of the drawings is required. The first word in line 28 of page 3 is obscured and should be amended for clarification.

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In line 3 of claim 5, the word "comprising" renders the claim indefinite because it does not form a closed Markush group. To overcome this rejection, "comprising" should be changed to "consisting of".

4. Claims 1 and 2 recite the limitation "the fluorite crystal structure" in line 3. There is insufficient antecedent basis for this limitation in the claims. Claims 3, 4, 6 and 9-11 are rejected for depending from a rejected parent claim.

5. Claims 7 and 8 recite the limitation "the catalytically active material" in line 3. There is insufficient antecedent basis for this limitation in the claims. Claims 7 and 8 should be amended to depend from claim 6 to overcome this rejection.

***Claim Rejections - 35 USC § 102***

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

7. Claims 1-11 are rejected under 35 U.S.C. 102(e) as being anticipated by Ouwerkerk et al. (2002/0122981 A1).

8. The applied reference has a common inventor with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention “by another,” or by an appropriate showing under 37 CFR 1.131.

9. Ouwerkerk et al. '981 teach a hydrogen storage alloy for use as a negative electrode in an electrochemical cell, comprising a hydrided alloy of magnesium and scandium with added palladium. The alloy can have the same composition as preferred embodiments of the instant invention (see paragraphs 2, 11-20, 32, 40).

Art Unit: 1724

***Conclusion***

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The reference to Osawa et al. (2006/0073066) discloses magnesium-based hydrogen storage alloys.
